

JOIN THE D8 TEAM!

We invite you to apply for a position at D8 Corporation - **IT systems architect** in financial technology. You will be responsible for implementation of changes and integration of new development modules into existing systems, finding solutions to problems reported by customers for systems operating in production environments.

Requirements for the candidate:

- Experience with C / C ++ and SQL technologies (practical experience of at least 3 years);
- Good knowledge and/or practical experience in Unix;
- Experience with Java, GoLang, React, Eclipse RCP, Eclipse IDE, GIT, SVN, web technologies (XML, CSS, HTML, Javascript, WebServices) will be considered as an advantage;
- Experience with payment card technologies, their functional requirements development and e-commerce solutions;
- Experience and interest in system integration, next-generation digital services, real-time analytics;
- Desire to grow and self-actualize in a team of motivated professionals;
- Initiative and a sense of responsibility towards the result achieved together.

Main job responsibilities:

- Developing IT solutions that meet the requirements presented by the customer and/or business analyst;
- Designing and building complex IT solutions in accordance with the capabilities of the products, analyzing the performance of D8 Corporation products and ensuring that the improvements are made when necessary;
- Writing technical documentation and specifications;
- Analyzing the impact of the system under question on other systems in the client's environment, integration possibilities with other systems, taking into account the constraints of the system and the requirements of the operating environment;
- Defining work tasks for programmers and performing resource capacity assessments;
- Assessing the quality of code created by the programmers and their assignment results, participate in system testing.
- Actively collaborating with the project team, both on the D8 side, on the client side, and with product owners.

We offer:

- The opportunity to work in an interesting and dynamic work environment with a team of professionals in financial technologies;
- Positive work environment and cooperative colleagues;
- Professional development and learning opportunities;
- Competitive salary (48,000-60,000 EUR per year before tax), depending on skills and experience
