

## JOIN OUR TEAM!

We are looking for a **Senior developer** who will become a technical lead in customer projects, being a part of D8 Corporation contactless payments (HCE) product team.

### Main job responsibilities:

After receiving the necessary initial training and support from the team, you will take responsibility for moving forward the customer projects, which include:

- Identifying and analyzing requirements, communicating with the client;
- Developing solutions based on product capabilities and customer-specific requirements;
- Developing specifications for others, as well as participating in the development process yourself;
- Solving technical complexities as they arise within your area of responsibility;
- Testing the developed solution;
- Preparing technical documentation.

### Requirements for the candidate:

- Work experience in senior developer position 5+ years;
- Technical knowledge: C, SQL, Unix, Java, GoLang, Eclipse RCP, Eclipse IDE, GIT, SVN, web technologies (XML, CSS, HTML, Javascript, WebServices);
- Willingness and ability to learn quickly (you will receive all the necessary training from the product team when you start working);
- Ability to see the whole picture of each project (from gathering initial customer requirements to go-live);
- Excellent communication skills, a teamwork-oriented personality;
- Strong sense of responsibility for your work.

### We offer:

- The opportunity to work in an interesting and dynamic work environment with a team of professionals in financial technologies;
- Positive work environment and cooperative colleagues;
- Professional development and learning opportunities;
- Competitive salary (36,000-48,000 EUR per year before tax), depending on skills and experience.
